Appl. No. 10/701,039 Atty. Docket No. 5922R2CCC Amdt. dated March 20, 2006 Reply to Office Action of December 21, 2005 Customer No. 27752

## LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

- 1. (Previously presented) A storage wrap material comprising:
  - (a) a sheet of material comprising one or more layers, and having a first, active side and a second side, said sheet comprising a plurality of protrusions integral with said first active side and said second side, said protrusions comprising from about 30% to about 70% by area of said first active side; and
  - (b) an adhesive continuously disposed upon said first active side; and, wherein said storage wrap material is linerless and is used by itself to wrap or seal materials.
- 2. (Original) The storage wrap material of Claim 1, wherein said protrusions are selected from the group consisting of deformable standoffs, removable standoffs, repositionable standoffs, frangible standoffs, and combinations thereof.
- 3. (Original) The storage wrap material of Claim 1, wherein said protrusions comprise an amorphous pattern.
- 4. (Original) The storage wrap material of Claim 1, wherein said protrusions are collapsible.
- 5. (Original) The storage wrap material of Claim 1, wherein said storage wrap material is perforated.
- 6. (Original) The storage wrap material of Claim 1, wherein said storage wrap material is selectively activatable.

Appl. No. 10/701,039 Atty. Docket No. 5922R2CCC Amdt. dated March 20, 2006 Reply to Office Action of December 21, 2005 Customer No. 27752

- 7. (Original) The storage wrap material of Claim 6, wherein said selective activation is selected from the group consisting of compression activation, extension activation, thermal activation, and combinations thereof.
- 8. (Original) The storage wrap material of Claim 6, wherein said storage wrap material is capable of forming a sealing engagement with a surface in response to a said selective activation.
- 9. (Original) The storage wrap material of Claim 8, wherein said storage wrap material has a peak adhesion peel force value ranging from about 1 ounce per linear inch (0.012 kg per linear cm) to about 50 ounces per linear inch (0.600 kg per linear cm).
- 10. (Original) The storage wrap material of Claim 1, wherein said storage wrap material is conformable.
- 11. (Original) The storage wrap material of Claim 1, wherein each of said protrusions has a base diameter and wherein said protrusions are spaced to provide a center-to-center average distance of about 2 protrusion base diameters.
- 12. (Original) The storage wrap material of Claim 11, wherein each of said protrusions has a height, said height being less than said base diameter of said protrusion
- 13. (Original) The storage wrap material of Claim 11, wherein each of said protrusions has a deformation resistance sufficient to withstand a pressure of at least about 0.1 pounds per square inch (0.69 kPa).
- 14. (Original) The storage wrap material of Claim 1, wherein said storage wrap material has an adhesion peel force after activation, said adhesion peel force being sufficient to form a barrier seal against a target surface, said seal exhibiting barrier properties at least as great as those of said sheet material.

- 15. (Original) The storage wrap material of Claim 1, wherein said first active side further comprises a substance disposed thereupon.
- 16. (Original) The storage wrap material of Claim 1, wherein said adhesive is a pressure-sensitive adhesive.
- 17. (Original) The storage wrap material of Claim 1, wherein said storage wrap material is clingless and exhibits no adhesion peel force prior to activation by a user.
- 18. (Original) The storage wrap material of Claim 1 further comprising a second adhesive, said second adhesive being disposed upon said second side.
- 19. (Original) The storage wrap material of Claim 18 further comprising a second sheet of material at least partially disposed upon said second adhesive.
- 20. (Cancelled)
